

Central Heating and Boilers

Yorkshire
Energy Services

Having an efficient central heating system will improve the thermal properties of your home, save you money on your fuel bills and could help improve your health as well. Yorkshire Energy Services offer quality condensing boilers and efficient central heating systems designed and manufactured to suit individual customers.

Why do I need central heating?

An efficient central heating system roughly uses the same amount of fuel as a standard gas fire. Rather than heating a single room, the whole house is covered, providing a warmer and healthier environment. Yorkshire Energy Services fit modern heating controls on all systems including thermostatic radiator valves, timer switches and room thermostats. Customers can benefit from regulating the temperature in different rooms and adjusting their system for their own personal comfort.

Why are condensing boilers more energy efficient?

Condensing boilers are 90% efficient and capture the excess heat that would otherwise escape through the flue or chimney. By utilising this heat the boiler doesn't work as hard, reducing the amount of fuel that it burns. There are two types of condensing boiler, conventional and combination. Conventional condensing boilers heat water and store it in a hot water cylinder. Condensing combination boilers provide instantaneous hot water and come as a single wall mounted unit.

Our Services

Yorkshire Energy Services can provide you with a free quote and offer free, impartial advice on the best system to suit your home. Working with an array of gas safe registered installers, we can provide you with a first rate service at a competitive price.

Yorkshire Energy Services only use quality products that are recommended for their durability, efficiency and reliability. All our boilers are 'A' rated and come with a 5 year manufacturers warranty.

Timescale

Installation timescales can vary depending on the chosen system and size of property. Typically, for a standard semi-detached house, the work will be completed in:

- Replacement Condensing Boiler - Up to a full day
- Full Central Heating System - Within 2-3 days

What else can we do to help?

After an installation our customers are given a gas safety certificate. All heating systems have a 5 year manufacturers warranty. We can also fit additional radiators and thermostatic radiator valves to existing systems and can replace mechanical boiler timers to digital programmers. Yorkshire Energy Services offer a full Powerflush service that cleans pipes, washes out radiators and restores the central heating system so it works to its full capacity.

Saving energy and saving money is easy

Small changes can bring big rewards. See how much you can save by following these 3 simple steps:

1 Call

Phone Yorkshire Energy Services on: **0800 0527496** and speak to one of our friendly advisors.

2 Quote

Receive your FREE 'no obligation' quote from an approved, qualified contractor.

3 Install

Sit back and let us manage the installation process. Our 'no quibble' customer service pledge, guarantees it's hassle free.
